| 5.0 Weekday vs Weekend Traffic Count Comparison ..... | 12 |

## APPENDICES

|            |                                       |
|------------|---------------------------------------|
| Appendix A | Traffic Counts                        |
| Appendix B | Excerpts from Lee County              |
| Appendix C | Old 41 at Terry Street Traffic Counts |

## 1.0 Executive Summary

The City of Bonita Springs retained FTE to prepare a Traffic Count Report. FTE collected Three-day Twenty-Four-hour traffic volume counts at Forty-Seven locations in February 2025. In addition, three-day Twenty-Four-hour weekend volume counts were collected at five locations. This effort is intended to provide the user with information concerning the 2025 traffic volumes along with historical data that may be useful in estimating future traffic volumes. Furthermore, 72-hour traffic volume counts at the Old US 41 and Terry Street roundabout were also counted. It should be noted that the machines installed for the tube counts recognize the number of axles. After collecting the data, the machine converts the data to vehicles by dividing the number of axles by two. Therefore, these traffic counts are usually higher when compared to the actual counts. For example, a Four-axle vehicle is counted as equivalent to two passenger cars by the machines. Users of this report should use their professional judgment to determine the applicability of this data to the study being performed.

Traffic counts were compared against Lee County historical data, where available.

Table 1 summarizes the traffic count data for all forty-seven locations along with the Level of Service (LOS). The actual count data is provided in Appendix A. As shown in the Appendix, each location contains a unique station ID. For example, for the count location no. 1224 Arroyal Road N of Bonita Beach Road (shown as location no. 1224 on Figure 1 and Table 1), “1224” represents the count location number.

Table 2 summarizes the historical traffic count data for all forty-seven locations, which was obtained from the Lee County Traffic Count Report 2012 from 2003 to 2008 where data was available. The 2009, 2010, 2012, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024 & 2025 data represents the counts performed by FTE or obtained from Lee County.

### Methodology for Estimating Average Daily Traffic (ADT)

The Average Daily Traffic (ADT) was calculated by adding the Three-day average of Direction 1 (NB or EB) and the Three-day average of Direction 2 (SB or WB).

### Methodology for Estimating Annual Average Daily Traffic (AADT)

Annual Average Daily Traffic (AADT) was obtained by multiplying the ADT with 0.93 (2024 FDOT Seasonal Factor for Bonita Springs which is provided in Appendix B) and traffic counts were rounded to the nearest 100 vehicles to determine AADT.

### Methodology for Obtaining Level of Service (LOS)

Peak hour two-way service volumes were calculated by multiplying AADT with the K Factor, which were obtained from the nearest Permanent Count Station (PCS) from the Lee County Traffic Count Database System. The LOS was derived after comparing peak hour two-way service volumes with Lee County Generalized peak hour two-way service volumes.

FDOT Functional Classification, where available, and the number of lanes were used to determine the LOS. Where FDOT Functional Classification wasn't available, it was assumed that the locations were Collectors.

Lee County Generalized peak hour two-way service volumes and PCS K Factor from the Lee County Traffic Count Database System are included in Appendix B.

The Three-day Twenty-Four-hour traffic volume count locations are shown in the following Figure and Table 1.

The weekday vs weekend traffic count comparison for the additional five locations is shown on page 12.

72-hour counts collected at Old US 41 and Terry Street roundabout are included in Appendix C.

| Traffic Count Locations                           |                                                                 |                                            |
